BOX

Function and design!

The Box browser is a functional and uncomplicated browser that presents and stores the books nicely.

The browser is available in a low model – Box 1 and a high model – Box 2.

The top part of both browsers consists of 4 compartments. Loose dividers can be ordered separately so each compartment can be divided into 4 smaller compartments.

The lower part of Box 1 consists of four compartments – two on each side of the browser and Box 2 has eight compartments –

four on each side of the browser.

The browser is made of lacquered MDF. A rubber mat is placed in each top compartment to ensure that even a small number of books will stay upright.

The browser comes assembled – only the castors have to be mounted.

Box 1: H54 x W72 x D72 cm + castors Ø8 cm

Box 2: H90 x W72 x D72 cm + castors Ø8 cm

The browser comes in white, but can also be manufactured in special colour finishes for a surcharge.
